NEXT-LEVEL DYNAMIC PERFORMANCE

Dynamic performance rises to the next level with e-Motion. e-Motion goes beyond quiet, stable running to deliver exhilarating levels of performance that will take your breath away. e-Motion: It's the future of e-SUVs right here, right now.

140kW Max Power | **360Nm** Max Torque

Delivering 140kW and 360Nm of torque instantly, you will experience powerful dynamic performance. Regenerative brakes transform the kinetic energy generated by braking into electrical energy for battery charging.

Paddle shifters (Regenerative Braking Control)
Paddle shifters add the fun factor by allowing you to control the level of regenerative braking for improved dynamic performance and energy efficiency.

SBW (Shift By Wire)

SBW incorporates the traditional T-shaped shift handle that every driver is familiar with, but it also includes a handy arrow guide on the lever top to help prevent shift selection errors while in the P gear. Also, turning the ignition on or off triggers "Welcome" and "Goodbye" voice messages for added confidence and convenience.
